

With Sony's Face Detection technology, the DSC-S750 detects up to three faces and optimizes focus and exposure for accurate, natural photos of family and friends. You can capture stunning detail thanks to its 7.2 megapixel resolution, 3x optical zoom lens, and view on the large 2.5" LCD screen

- 7.2 Megapixel Super HAD™ CCD**
 More megapixels give you more detail and definition when you make big prints or crop in tight on your subject. The advanced Sony® Super HAD™ (Hole Accumulated Diode) CCD design allows more light to pass to each pixel, increasing sensitivity and reducing noise.
- 3X Optical Zoom Lens**
 3X optical zoom brings distant subjects closer to help you capture sharp, detailed long shots and quickly frame images for better composition -- great for family sports, outdoor fun, and travel photos.
- 2.5" TFT LCD Display**
 The large, bright 2.5" TFT LCD display makes it easy to compose shots, check results, and read menus in sharp natural color, even in bright sunlight.
- Face Detection**
 Face Detection technology automatically controls focus and exposure to help reveal faces in shadows, make skin tones look more natural, reduce red-eye, and eliminates harsh facial glare.
- 5-Point Auto Focus**
 A five-point auto focus evaluates your shot at 5 points on your screen -- so you'll get great results even with off-center subjects that make interesting photo compositions.
- High Sensitivity (ISO 1250) Mode**
 For sharp, flash-free photos without blur, high sensitivity (ISO 1250) allows shooting at higher shutter speeds for better pictures in low-light conditions -- great for birthday parties, indoor gatherings, and candid portraits.
- Convenient Photo Modes**
 To adjust quickly for specific shooting situations, you can choose from several convenient photo modes, including Auto, Program Auto, and Scene Selections such as Twilight, Twilight Portrait, Landscape, Soft Snap, Snow, High Sensitivity, and Beach environments.
- QVGA Movie Mode**
 Capture 320 x 240 audio/video clips at high frame rate (up to 30 frames per second⁷). The maximum length of time you can shoot continuously is about 10 minutes.
- Smart Zoom® Feature⁵**
 The Sony Smart Zoom® feature⁵ intelligently "crops into" the central portion of interest in your photo, helping avoid the image degradation of other digital zooms.
- Burst Mode**
 You can fire off up to 3 shots at Approx. 1.2 second intervals at any resolution (VGA to full) -- a great way to capture a child's first steps or a pet's best tricks.
- Histogram**
 Histogram display gives you more control over your images with the ability to optimize exposure adjustments for better detail in both light and dark areas of a photo.
- 22 MB² Internal Memory**
 Even if you forget your flash memory card, you can get the shot because 22 MB² internal memory lets you capture a limited number of shots with in-camera convenience, then easily transfer your shots to a PC or optional Memory Stick PRO Duo™ Media.
- Memory Stick PRO Duo™ Media Convenience**
 A built-in slot accepts optional Memory Stick Duo™ media or Memory Stick PRO Duo™ media -- the compact, high-capacity storage media that make it easy to upload photos to your PC and are compatible with millions of devices worldwide.
- Stamina® Battery Power**
 Provides extended battery life and shooting capacity when using a fully charged Lithium Ion battery -- enough to cover a long weekend or a whole vacation.
- Direct Playback button**
 Direct Playback Button provides one-touch ability to review images while shooting, or quickly start up Playback Mode from power-off status.
- Picture Motion Browser Software**
 Supplied software makes it easier to upload, organize, and search photos on your PC. When shooting photos using your camera and an optional GPS unit, the software even provides a convenient map view function that lets you sort photos by location and display their origin on a world map⁹.

DSC-S750

Cyber-shot® Digital Still Camera

Specifications

General

Megapixel: 7.2MP
Imaging Device: 1/2.5" Super HAD™ CCD
Recording Media: 22MB² internal Flash Memory, optional Memory Stick Duo™ Media, optional Memory Stick PRO Duo™ Media

Convenience

Still Image Mode(s): JPEG: Normal, Burst

Hardware

LCD: 2.5"¹
Viewfinder: N/A
Lens Construction: 6 Elements in 5 Groups (including 3 aspheric elements)
Microphone/Speaker: Yes/Yes
Lens Type: Sony
Docking Station: N/A

Optics/Lens

Focal Length: 5.8 to 17.4 mm
35mm Equivalent: 35-105mm
Focus: Preset ∞ (0.5m / 1.0m / 3.0m / 7.0m / Unlimited distance)
Aperture Range: Auto and Program Auto: f2.8(W) - f9.7(T)
Shutter Speed: Auto (1/8 - 1/2000) / Program Auto (1" - 1/2000)
ISO: Auto / 100 / 200 / 400 / 800 / 1250
Smart Zoom® Technology: Smart Zoom / Precision Digital Zoom / Off
Digital Zoom: 0-2.0X (Precision)
Optical Zoom: 3x
Minimum Focus Distance: W: Approx. 19 11/16(50cm) - Infinity / T: Approx. 19 11/16 (50cm) - Infinity
EV Compensation: Plus / Minus 2.0EV, 1 / 3EV step

Software

Supplied Software: Windows: Picture Motion Browser Vers 2.2 + USB Driver
Operating System Compatibility: Microsoft® 2000 Professional, XP Home and Professional; Macintosh® OS 9.1/9.2/OS X (10.0-10.4)

Dimensions

Weight: Weight(Body):4.5oz / 128g Weight (With Accy with MSDuo & Supplied Accessories): 5.3oz / 150g

Measurements: Dimensions (WxHxD, excluding protrusions): 3 9/16 x 2 3/16 x 1 1/16" 90.8mm x 56.0mm x 26.5mm

Service and Warranty Information

Limited Warranty Term: 1 Year Parts & Labor

Supplied Accessories

Lithium-ion rechargeable battery (NP-BK1)
Battery Charger (BC-CSK)
Dedicated AV cable
Dedicated USB cable
Wrist strap
Software CD-ROM
Note: Memory Stick PRO Duo™ Media or adaptors are not included.

Optional Accessories

GPS Unit Kit (GPS-CS1KA)
Soft Carrying Case (LCS-CSD, LCS-CSJ)
Memory Stick PRO Duo Media™ (MSX-256S)
Memory Stick PRO Duo Media™ (MSX-1GS)
Memory Stick PRO Duo Media™ (MSX-1GN)
Memory Stick PRO Duo Media™ (MSX-2GN)
Memory Stick PRO Duo Media™ (MSX-M4GS)
Memory Stick PRO Duo Media™ USB Adaptor (MSAC-US30)
Multi-slot Memory Stick® Adaptor (MSAC-USM1)

Color: Silver
UPC Code: 027242724945

1. Viewable area: measured diagonally.
2. Available storage capacity may vary and a portion of the memory is used for data management functions.
3. HD viewing requires a Sony HD connector cable or HD Cyber-shot Station® cradle and HDTV. All sold separately.
4. Music tracks can be up to five minutes long. When using Music Transfer to download music, tracks longer than five minutes will be reduced to five minutes when uploading to the Cyber-shot®.
5. Smart Zoom® feature will not work at highest resolution setting.
6. Up to 6 shots while in Smile Shutter mode.
7. Shooting at high frame rate of up to 30 frames per second requires Memory Stick PRO Duo™ media.
8. Special TV settings are required. Further details are available in the BRAVIA® HDTV instruction manual.
9. Online map service currently provided by Google and is subject to change or termination without notice.
